RAPID RESPONSE SYSTEM

EMERGENCY STRUCTURE SOLUTION

COVID-19 IS STRAINING OUR HEALTHCARE SYSTEM

RAPIDLY EXPAND YOUR CAPACITY

With medical facilities all over the country reaching capacity, we've been drawn to help in anyway we can. We've used our innovation expertise to develop a system that empowers healthcare organizations to treat more patients, while working to maintain the safety of caregivers and patients.

Our Rapid Response System, is a swiftly deployed, smart scalable, feature rich, emergency wall solution. Whether you are increasing bed count, creating drive thru testing stations, or facilitating out patient visits we can design and implement a customized solution in a matter of days not weeks. In the following pages we've laid out the details of our system and provided several sample solutions utilizing our Rapid Response System.

OUR SOLUTION

A MODULAR WALL SYSTEM

VERSATILE

PRECISE

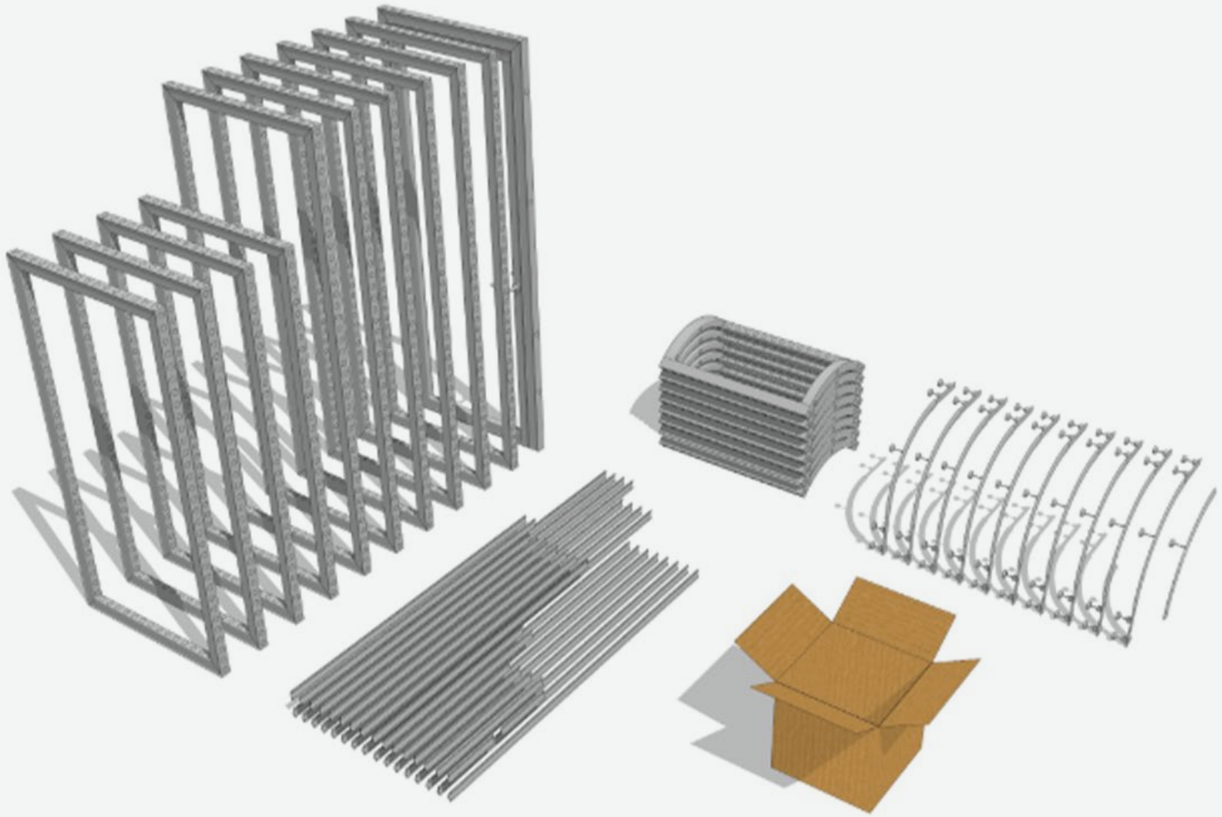
EFFICIENT

©IACONO* | LIVE!

VERSATILITY

Modular frame system

Here we see a sample kit of parts. A single frame profile is in-filled with hard panels on both sides. This creates a sound dampening effect to reduce ambient noise and increase privacy. The in-fill can be quickly sanitized between patients. A plethora of widths and heights are available as well as doors, glass paneling, and integrated lighting. The same frame can be used to build walls, ceilings, signage, or even furniture. With a constantly evolving situation on the ground, this versatility allows our system to be redeployed as resources shift to meet needs.



PRECISION

American Innovation, German Precision

Each component is precisely engineered and manufactured to extremely tight tolerances. These high standards in concept and execution lead to exceedingly high fit and finish, which translate directly to increased patient and staff safety in a challenging healthcare environment.

EFFICIENCY

Flat Pack and Tool-Free

A standard system includes up to 19 frames. A simple system of tool-free hardware makes setup a snap. A basic 10' x 10' booth can be set up by two people, with zero training, in under an hour. Rooms can be set-up and taken down as needed, with walls safely stored in their crates when not in use.

tool-free connections

IN THE FIELD

Expand capacity in minutes

Our Rapid Response System can be deployed practically anywhere, in a endless array of configurations, from simple bed dividers to fully enclosed suites.

BED DIVIDERS

A rolling bed divider with integrated locking casters. Our durable in-fill panels have a gloss white, easy to clean finish. These panels are very durable and acceptable for interior and exterior use. Dividers can be ganged together to create longer units, on-site, as needed.

THE POWER OF PARTNERSHIP!

LIVE! + iacono

LIVE! Technologies acquired Iacono Productions, creating one of the largest event, video production, specialty fabrication and creative services companies in the Midwest.

So what does this mean for you?

We are now able to provide you with an even wider range of services. A more extensive catalog of inventory and technology. A larger creative services team. And more ways than ever to help you create experiences that make audiences say **"wow!"**
